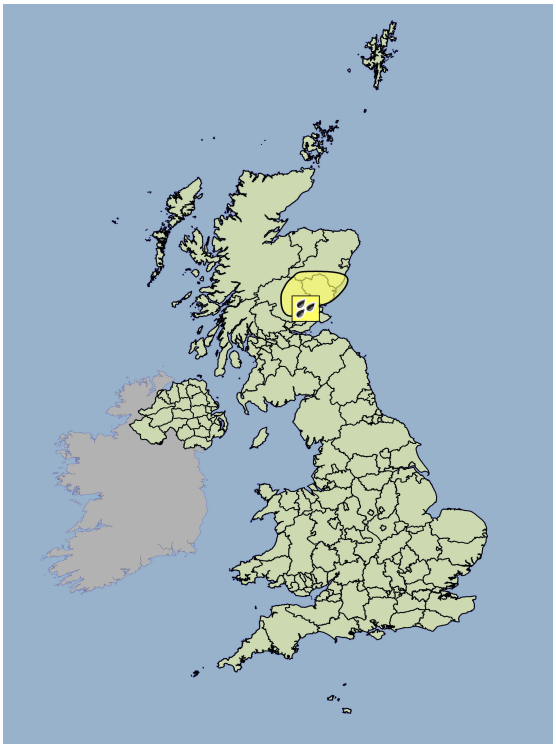
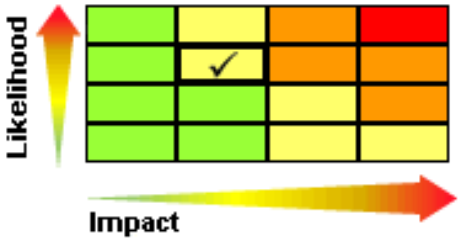
National Severe Weather Warning Service





Chief Forecasters Assessment
Following recent heavy rain, a further band of prolonged, sometimes heavy rain, may become slow moving over already saturated parts of Eastern Scotland on Friday night into Saturday morning. 20-30 mm of rain may well fall widely, with 40 mm possible, especially on high ground, which may lead to localised flooding.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **21:00 on Fri, 21st Nov 2014** until **09:00 on Sat, 22nd Nov 2014**

A further period of prolonged rain is expected on Friday evening and early Saturday. This will fall on already saturated catchments and may lead to some minor localised flooding on Saturday across Tayside and Angus.

The public should be aware of the risk of disruption to transport and localised flooding.
